## CAREER OBJECTIVE

BCA graduate (2026) with a strong foundation in web designing and development (HTML, CSS, JavaScript) along with core computer science fundamentals including Java, Python, C++, and DBMS/SQL. Possesses strong typing proficiency and hands-on knowledge of computer fundamentals. Seeking an opportunity to apply technical and analytical skills in a role involving web development, IT support, or computer operations.

---

## EDUCATION

### Bachelor of Computer Applications (BCA)

National PG College | 2023 - 2026 | CGPA: 7.3 (Grade B+)

### Senior Secondary (12th), CBSE Board

St. Mary's Day Inter College | 2022 | Percentage: 90.17%

### Secondary (10th), CBSE Board

St. Mary's Day Inter College | 2020 | Percentage: 90.33%

**O Level (Computer Course) – UT Computer Educational & Welfare Society | Grade: B**

**CCC (Course on Computer Concepts) | Grade: A**

---

## TECHNICAL SKILLS

**Web Development:** HTML, CSS, JavaScript, MERN Stack (MongoDB, Express.js, React.js, Node.js)

**Programming Languages:** Java, Python, C++

**Database:** DBMS, SQL

**Computer Fundamentals:** Operating Systems, Networking Basics, MS Office

---

## TYPING & STENOGRAPHY SKILLS

- English Typing Speed: 48 WPM
- Hindi Typing Speed: 20 WPM
- Hindi Stenography: 80 WPM (currently improving further)

---

## PROJECTS

### Personal Portfolio Website

Individual Project | Web Development

- Designed and developed a personal portfolio website to showcase skills, projects, and certifications.
- Built independently using web development fundamentals, deployed and accessible at akshatsharmaa.vercel.app.

### Smart Dustbin – IoT-Based Waste Monitoring System

Group Project | MERN Stack, IoT Sensors

- Built an IoT-enabled dustbin system that detects fill level using sensors in real time.
- Implemented automatic notifications and live location sharing on reaching full capacity, with a MERN-based web interface.

## **AgroSmart – AI & IoT Based Smart Farming System**

*Group Project | MERN Stack, AI, IoT Sensors*

- Built a smart farming solution combining AI and IoT sensors to monitor field and crop conditions.
- Delivered real-time data and insights to farmers using a MERN stack-based application.

## **College Website Redesign**

*Final Year Project | Web Development*

- Redesigned the official college website as part of the final year project, improving layout, usability, and overall design.

## **CERTIFICATIONS**

---

- Google AI-ML Virtual Internship – EduSkills
- Google Android Development Virtual Internship – EduSkills
- Celonis Process Mining Virtual Internship – EduSkills
- Altair Data Science Virtual Internship – EduSkills
- Employability Skills (Job Ready) – EduSkills
- Generative AI Virtual Internship – EduSkills
- Juniper Networking Cloud Virtual Internship – EduSkills

## **EXTRACURRICULAR ACTIVITIES**

---

- Participated in TechFest, TechExpo, and Latent Talent Hunt at college level, presenting group projects.
